

Lochinvar Boiler Systems

The smartest choice to heat your home!

Throughout the heating season, you need to make sure your family stays comfortable. It's also important to conserve energy and reduce how much you pay to heat your home.

SMART SYSTEM™

Every KNIGHT boiler has SMART SYSTEM, the industry's most advanced boiler control.

With a large LCD screen and easy-to-use soft keys, SMART SYSTEM gives you and your contractor a complete database of performance history, and an unprecedented level of control over all system functions.

And the Outdoor Air Reset feature automatically adjusts the boiler supply temperature based on the temperature outdoors. This smart function of the control saves you energy every day of the year that the outdoor temperature is above the worst-case scenario design temperature of the heating system.

A yellow screen alerts when your boiler requires maintenance, and gives you the name and number of your installing contractor
